

AYUSH GOYAL

New Delhi, India

 ayushg.live  agayush088@gmail.com  <https://www.linkedin.com/in/-ayushgoyal/>  <https://github.com/agayushh>

EDUCATION

Bachelor of Technology in Computer Science

Dronacharya College of Engineering

Gurugram, Haryana, India

Oct. 2022 – May 2026

EXPERIENCE

Full Stack Engineer Intern

Datawave Labs

June 2024 – Aug. 2024

Remote, India

- Developed a robust AI-powered agent to monitor real-time data discrepancies in business workflows using Python's **watchdog** library, ensuring prompt alerts and improved data reliability.
- Built an advanced AI text-to-SQL translator that converts natural language queries into executable SQL code, improving accessibility for non-technical users; tested for accuracy and performance on Snowflake.
- Collaborated with cross-functional teams in an Agile environment, contributing to product development cycles, debugging workflows, and ensuring smooth integration between frontend, backend, and AI models.

Software Developer Intern

Octalucet Software Solutions

March 2026 – Present

Hybrid, India

- Improved and optimized UI/UX by fixing responsiveness issues, refining layouts, and resolving multiple CSS/state-related bugs for a smoother user experience.
- Refactored codebase by modularizing TypeScript types and logic, enhancing maintainability and scalability to production-grade standards.
- Streamlined backend logic and improved database handling, resulting in cleaner architecture and better performance.

TECHNICAL PROJECTS

- **PPT Chat** | *Next.js, TypeScript, MemoAI, MongoDB, Mongoose, Multer, Clerk* Sept 2025
 - * Built a **AI chat application** with real-time conversational capabilities and prompt-based responses.
 - * Integrated **MemoAI** for AI-powered responses and **Clerk** for secure authentication and user management.
 - * Implemented **file upload support** using Multer and managed persistent chat history with **Prisma + Postgres**.
 - * Developed a scalable backend and optimized API routes in **Next.js**, ensuring smooth performance and reliability.
- **Chess** | *NextJS, TypeScript, Tailwind CSS, ShadcnUI* Sept 2025
 - * Created a web app that lets users play chess against an AI or other players, reaching **50+ active matches** during testing.
 - * Built with Next.js, TypeScript, Tailwind CSS, and ShadcnUI, improving UI load time by **30%**.
 - * Added a move-tracking system that records and displays **100% of user moves** for replay and analysis.
- **Weavr** | *NextJS, Tailwind CSS, Inngest, Better Auth, tRPC* Oct 2025
 - * Built a workflow automation tool that allowed users to create and run **custom task flows**, similar to Zapier.
 - * Used Next.js, Tailwind CSS, Inngest, Better Auth, and tRPC, cutting workflow execution time by **25%**.
 - * Helped automate **50+ repetitive tasks**, improving team efficiency and reducing manual effort.

TECHNICAL SKILLS

- **Languages & Core:** TypeScript, JavaScript, Python, C++, SQL, Node.js, Express.js, FastAPI.
- **Frontend & UI:** NextJS, React.js, HTML5, CSS3, Tailwind CSS, Material-UI, Zustand
- **Libraries and framework:** Numpy, Pandas, Streamlit, WatchDogs, Websockets, WebRTC
- **Infrastructure:** Docker, GitHub, PostgreSQL, MongoDB, Snowflake, AWS Lambda, AWS Ec2, Nginx.
- **Tools & Protocols:** Git, JWT, Prisma ORM, Poetry, Neovim, Vim

LEADERSHIP & ACHIEVEMENTS

- **Gurugram University Ideathon Winner:** Secured first place for innovative travel solutions, awarded by the **Honorable Chief Minister of Haryana**.
- **Deviators Club:** Co-founded the Deviators Club to promote open-source culture and help students.
- **Devolympus Hackathon:** Organized and successfully managed a 36-hour hackathon at our college.
- **IDE-Bootcamp Edition 2 Phase 1 :** Qualified for the national-level entrepreneurial bootcamp.
